Press Release

Strategic Partnership with VIT Infotech, India.

San Diego, September 30, 2008: InControl Technology, the premier global provider of the first agent-less IT Asset Discovery, Inventory, and Intelligence solution, MasterControl, and the premier IT asset energy management suite EnergyControl, is proud to announce its strategic IT Green partnership with VIT Infotech to introduce its IT Green product EnergyControl to the Indian market.

EnergyControl provides any organization with the immediate ability to manage energy, cost and CO₂ emissions across the desktop. Now any public or private sector organization can extend the powerful data collected by EnergyControl and formulate identifiable Energy savings and a solid Green initiative. EnergyControl is also the first software product certified Energy Star SSP (service provider partner) with the US Department of Energy.

"InControl Technology has moved to the next step of IT Asset utilization with EnergyControl" said Ben McCullom, EVP of InControl Technology. "India is clearly now one of the most recognizable and innovative business leaders in the world today. Our partnership with VIT is a commitment to this extraordinary market and provides EnergyControl to help Indian companies of all sizes manage energy consumption and CO₂ emissions and at the same time lower costs. Immediate energy cost reduction, a clear picture for efficient technology refresh and the ability to send a clear corporate message of Green results, all amount to significant benefits and good business for all organizations."

"Lately, there has been a pronounced trend in India to go the Green way. Given that India is the global hub for software services business, intuitive products such as InControl Technology' EnergyControl IT Green suite will help companies monitor power consumption of their IT Assets, lower cost and consumption, thereby reducing carbon emissions" said Ravi H. Krishnamurthy, CEO & Managing Director of VIT. He added, "From being a partner in the design & development of this product to becoming a reseller, VIT truly believes that this is a great value-add for Indian IT companies, enterprises, and government establishments. We are very excited about this offering".
